Shahriar Hossen Fahim (Roll: 12)

Farzana Tasnim (Roll: 14)

Md. Tauseef - Ur - Rahman (Roll: 24)

Amina Islam (Roll: 36)

Tamzid Bin Tariq (Roll: 48)

## **Project Summary**

MedWise is a web-based platform designed to help users manage their medical records and access trustworthy health information. Users can upload scanned reports, from which the system extracts key data to automatically update their medical history. This allows for easy, organized tracking of clinical records.

Key features include secure storage of medical reports with a timeline view, an NLP-powered chatbot that provides probable disease descriptions and lifestyle advice, exportable health summaries, a searchable disease database, and a directory of top hospitals and treatment options. Users can also browse symptoms and disease information, with the chatbot offering interactive support.

MedWise aims to simplify personal health management by combining smart record-keeping with accessible medical knowledge.
